Sir/Madam

**PHONE-IN ELECTRICITY METER READINGS**

Please note that no phone-in meter readings will be accepted by the municipality from the 1<sup>st</sup> July 2013. Customers that are registered to phone-in their meter readings must either change to a prepaid meter or give full access to the municipality to read their meter on a monthly basis. No special arrangements will be entertained to read the meter.

The prepaid tariff was made cheaper to encourage customers to migrate to prepaid meters. The savings that will be realized on a consumption of 500, 800, 1000, 1500 & 2000 KWH/month is R35.32, R76.36, R103.72, R172.12 and R240.52 per month, respectively. The above figures indicate that bigger savings are achieved on a higher consumption and this will also be beneficial in the winter months when customers tend to consume more power.

Please contact the Electrical Engineering Services Department to make the necessary arrangements, should you decide to convert to a prepaid meter.

The cost to convert to a standard single phase prepaid meter is R1161.55 (VAT inclusive). Arrangements can be made with the Finance Department to pay the amount over a period of six months.

Please note that if access is still denied after the 1<sup>st</sup> of July 2013, then your services account will be debited with the cost to convert to a prepaid meter and a prepaid meter will be installed on your premise.

Yours faithfully

  
A SOMPERSADH
